

## Terson syndrome

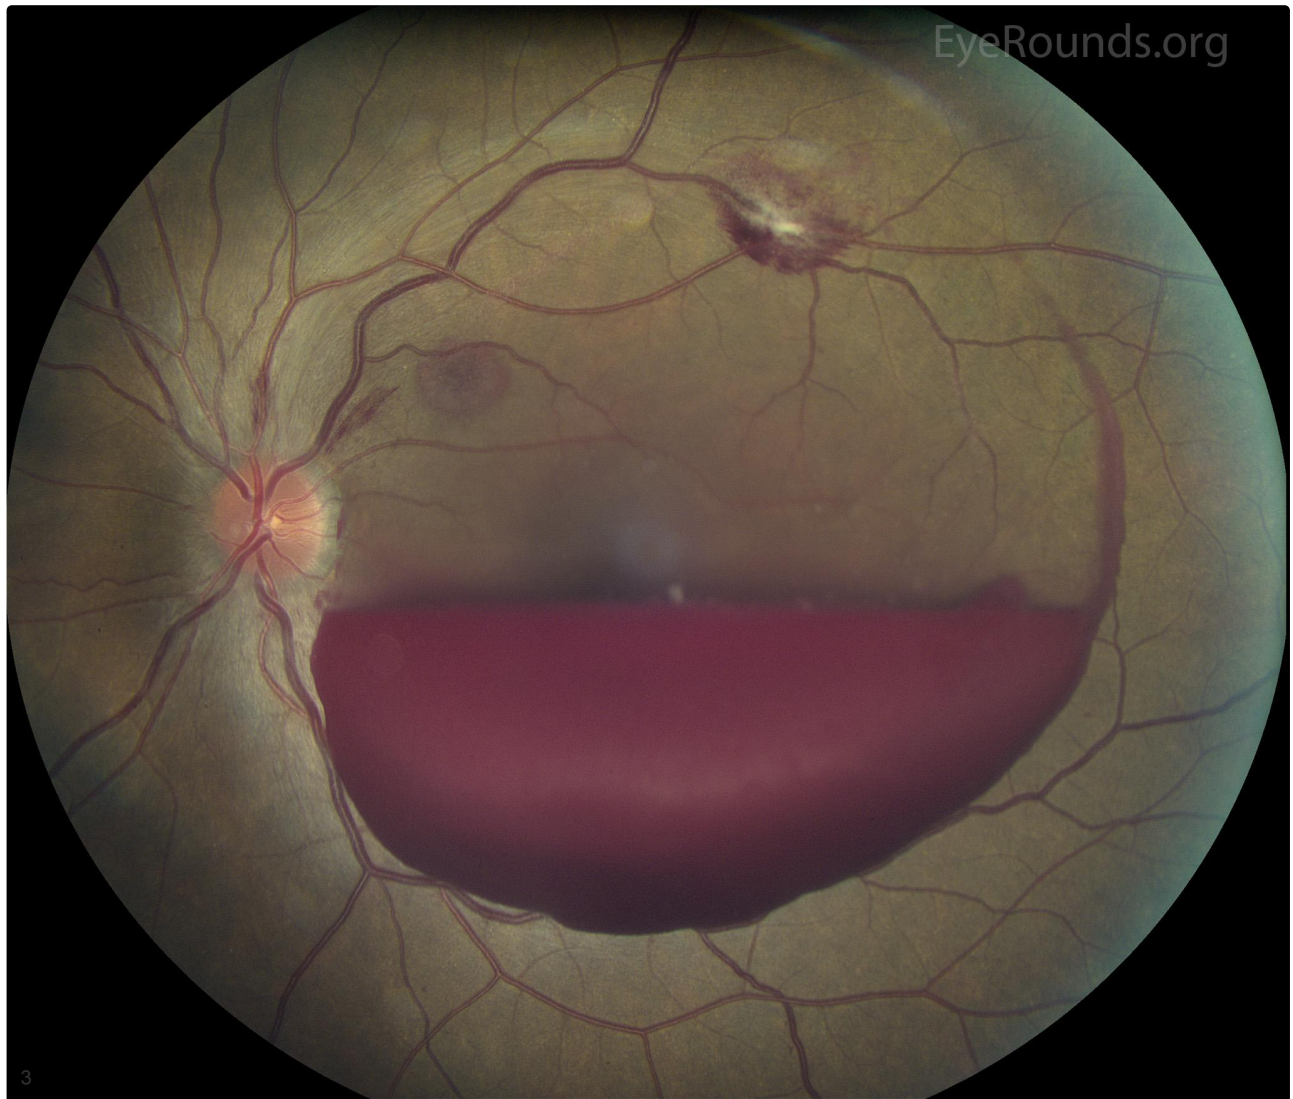

**Category(ies):** Retina, Vitreous

**Contributor:** [Jesse Vislisel, MD](#)

**Photographer:** Antionette Venckus, CRA

Terson syndrome is the presence of vitreous or sub-internal limiting membrane (ILM) hemorrhage after acute intracranial hemorrhage. It has been hypothesized that the bleeding results when a sudden rise in intracranial pressure causes rupture of retinal and peripapillary vessels.

This photo shows a patient with a large sub-ILM hemorrhage.
